

\$1.00

*Could you save
ONE DOLLAR
per day?*

\$1.00

Example:

If you could save one dollar a day, then after 30 years, at 10%, that one dollar a day would be worth \$60,040.

At 12.5%, that one dollar a day would be worth \$97,070.

Add the employer match, and your one dollar a day would be worth \$121,338.

*as applicable

Example:

If you took the \$121,338 and withdrew it over 20 years, continuing to earn an 8% annual return, you would receive:

\$12,359 each year for 20 years
(\$1,030 per month)
